

Songs in English

I have faith in the human soul

(Melodi: Fairy tale)

Years ago, we should have acted
(But) we kept on, although we knew
(That) fossil fuel, will kill our future,
Worst of fears, they might come true

*(But) I have faith in the human soul
Even though it hurts
If we don't stop with our oil and coal
We're forever cursed*

Everyday we will need fighting,
For our kids, and with our love
Nothing else is gonna save us
and nothing else will lift us high above
Noone knows, the perfect way there
But you must act. Must do your part

(A) tipping point, from social movements
Will get us there,
we'll get a brand new start

*I have faith in the human soul
Even though it hurts
If we don't stop with our oil and coal
We're forever cursed*

It's no fairy tale
That is why it hurts
If we don't change on a massive scale
We're forever cursed

Worrying kind

(Melodi: Worrying kind)

Care, we want to make you
Care! We want to shake you!
Wake you from your shortsighted mind
Cause we often find
That you're ages behind
(To) survive you, need the worrying kind

(The) world, you're 'bout to break 'it
(The) world, you're 'bout to make it
warmer than what's humanly fit
When you turn up the heat
it means human defeat
We say stop! We're the worrying kind.

So if you see us somewhere,
on the street or the square,
Words-of panic and fear on our sign,
Come and give us support, 'cause you do need our sort,
It will never be fine, If we don't care

(You) let the world be destroyed with your head in the can,
(You're) wasting your potential as a superman
(It's) not us who are strange
We don't aim to derange.
When we're saying to you all to change for climate change!

(The) world, you're 'bout to break 'it
(The) world, you're 'bout to make it
warmer than what's humanly fit
When you turn up the heat
it means human defeat
We say stop! We're the worrying kind.

So if you see us somewhere,
on the street or the square,
Words-of panic and fear on our sign,
Come and give us support, 'cause you do need our sort,
It will never be fine
If we don't care

(You) let the world be destroyed with your head in the can,
(You're) wasting your potential as a superman
(It's) not us who are strange
We don't aim to derange.
When we're saying to you all to change for climate change!

Care, we want to make you
Care! We want to shake you!
Wake you from your shortsighted mind
Cause we often find
That you're ages behind
(To) survive you, need the worrying kind

When you turn up the heat
It means human defeat
We say stop! We're the worrying kind.
Yes, to turn up the heat
It means human defeat
We say stop! We're the worrying kind.

10 years

(Melodi: 10 years)

We have a new world, since a decade now
Still everyday I'm lovin' it more
It-was-so gloomy, hope was gone
I-sure-I never want the same as before

*I don't wanna know would what had happened
If we never had banned the oil
We did all believe before,
we would sure be boiled
I don't wanna know what would had happened
If we never had gone on strike
Everything about it, I like*

We started out too late. We couldn't take it slowly
Change takes some time
Had so little time, but made it work in time
Yes., we made it just fine
How does it keep getting better?
Everyday our world finds a new way to grow
And a fossil free lifestyle. Hmm, simply works well
We got a good thing going!

And just when I thought, that my world was set
I found places that I never explored
It's so fascinating
I can't remember the last time I was bored

I don't wanna know would what had happened ... (refr)

How does it keep getting better?
Everyday our world finds a new way to grow (finds a
new way to grow)
And a fossil free lifestyle Hmm, feels good
How does it keep getting better?

Everyday our world finds a new way to grow
And a fossil free lifestyle
Hmm, simply feels good
We got a good thing going

We're burning up

(Melodi: Its' raining men)

Here's the weather news
Yeah, have we got news for you!
(You better listen)
Get ready all to get out on the streets
And leave your obedience at home. (Alright)

Temperature's rising,
our mood is getting low
According to all sources (What sources now?)
(The) street's the place to go
(You better hurry up)
'Cause right now for the first time (First time)
Our earth is under threat
(It's) the worst time in history
We've taken all there is to get

*We're burning up. Now it's serious
We're burning up, oh yeah! We're gonna go out.
We're gonna shout and scream:
(That) oil and coal will kill our dreams:
We're burning up
Now it's serious
We're burning up
We're in living hell*

Shout, scream, (for) all our worth,
until we stop destroying earth
You'll kill Mother Nature,
You have made her heat and burn
You took all she could give,
We're at point of no return
Let's point out the guilty
Companies for oil and coal
A world that we can leave in,
Should be our common goal
We're burning up.... (refr.)

Engagera dig! Vad vi gör nu avgör dina barns och barnbarns klimat

Vi lever i en skrämmande tid. Klimatet värms snabbare än någonsin
i mänsklighetens historia och ekosystem förstörs i snabb takt.

Det är lätt att känna sig ensam och hjälplös och fastna i passivitet.
Men när vi agerar tillsammans blir det lättare att våga börja prata
om de utmaningar vi står inför. När vi når en social brytpunkt kan
också en positiv förändring gå snabbt.

Kom med och engagera dig, kom in i gemenskapen och var en del
av lösningen på utmaningen som mänskligheten och allt levande
står inför!
